Designing Critical Literacy Education Through Critical Discourse Analysis Pedagogical And Research Tools For Teacher Researchers

Now in its fourth edition, the Handbook of Research on Teaching the English Language Arts – sponsored by the International Literacy Association and the National Council of Teachers of English – remains at the forefront in bringing together prominent scholars, researchers, and professional leaders to offer an integrated perspective on teaching the English language arts and a comprehensive overview of research in the field. Reflecting important developments since the publication of the third edition in 2010, this new edition is streamlined and completely restructured around “big ideas” in the field related to theoretical and research foundations, learners in context, and new literacies. A Companion Website extends and enhances the Handbook with a wealth of additional resources. The Handbook of Research on Teaching the English Language Arts, Fourth Edition: Addresses all of the language arts within a holistic perspective (speaking/listening, language, writing, reading). Is well grounded and balanced in theory and research while promoting validated practices. Features authors who are known for their expertise and who represent diversity in culture, years in the profession, and geographic location. Gives attention to special populations and instructional contexts. Includes new media literacies. Has the authority of a research handbook while remaining practical for students in masters and doctoral classes.

A high level of literacy in both print and digital media is required for negotiating most aspects of 21st-century life, including supporting a family, education, health, civic participation, and competitiveness in the global economy. Yet, more than 90 million U.S. adults lack adequate literacy. Furthermore, only 38 percent of U.S. 12th graders are at or above proficient in reading. Improving Adult Literacy Instruction synthesizes the research on literacy and learning to improve literacy instruction in the United States and to recommend a more systemic approach to research, practice, and policy. The book focuses on individuals ages 16 and older who are not in K-12 education. It identifies factors that affect literacy development in adolescence and adulthood in general, and examines their implications for strengthening literacy instruction for this population. It also discusses technologies for learning that can assist with multiple aspects of teaching, assessment, and accommodations for learning. There is inadequate knowledge about effective instructional practices and a need for better assessment and ongoing monitoring of adult students’ proficiencies, weaknesses, instructional environments, and progress, which might guide instructional planning. Improving Adult Literacy Instruction recommends a program of research and innovation to validate, identify the boundaries of, and extend current knowledge to improve instruction for adults and adolescents outside school. The book is a valuable resource for curriculum developers, federal agencies such as the Department of Education, administrators, educators, and funding agencies.

Learning strategies for critical thinking are a vital part of today’s curriculum as students have few additional opportunities to learn these skills outside of school environments. Therefore, it is of utmost importance for pre-service teachers to learn how to infuse critical thinking skill development in every academic subject to assist future students in developing these skills. The Handbook of Research on Critical Thinking Strategies in Pre-Service Learning Environments is a collection of innovative research on the methods and applications of critical thinking that highlights ways to effectively use critical thinking strategies and implement critical thinking skill development into courses. While highlighting topics including deep learning, metacognition, and discourse analysis, this book is ideally designed for educators, academicians, researchers, and students.

This is an accessible guide to critical literacy, a process in which learners are encouraged to challenge and critique language and social practices and actively transform what they see as unjust or unfair. Crucial critical literacy concepts such as access, power, reconstruction and transformation are explored in respect of both the wider literature and as they relate to the experiences and practices of those educators who feature in the book. The key practice areas for developing children’s criticality are also covered, including the use of tools, children’s literature, comic books and graphic novels, photographs and new technologies. Threaded throughout the book are the intersecting social justice issues of gender, race, disability, displacement and social class. Material is drawn primarily from educators’ own narratives about transformative change in their practice – including their struggles to understand and enact critical literacy – alongside examples of their pedagogies for social change. The author identifies a number of clear directions for educators interested in using a critical pedagogical approach in their work with children and young people – helping them to understand what critical literacy is; how they can weave it into their own practices; with which ages, stages and grades critical literacy can be used; and how they can get started using critical literacy in their classrooms.

This book presents a participatory action research study exploring the social identity and academic literacies of bilingual preservice teachers. It describes the transformative experiences of undergraduate students during their participation in a program especially designed to develop bilingual teachers in Hawaii, USA. Further, it discusses how the curriculum and instruction in the classroom provide a ‘third space’ for facilitating peer interaction and critical reflection on such issues as academic literacy, heritage language education, and teacher identity. In doing so, it connects ideas of social identity and academic literacies of bilingual preservice teachers to the “real work” of mentoring and teaching PreK-12 students themselves.

In this book, Falk-Ross and the contributing authors offer their different perspectives on supporting English language learners through specific strategies for assessment and instruction. It presents specific issues and challenges, supportive research and up-to-date information, classroom implications and strategies, and case study applications.

Offering a unique, reflexive framework for Critical Discourse Analysis focused on discourses of hope, transformation, and liberation, this book showcases a variety of powerful literacies in action. Drawing from original research in a range of public, educational spaces across the lifespan—from Kindergartners studying social justice movements, to sixth graders designing a social justice museum exhibit focused on the environment and sustainability, to teacher education students practicing racial literacy in response to the death of Michael Brown in Ferguson, Missouri—Rogers makes the case that critical social theories often associated with Critical Discourse Analysis have not kept pace with a recent shift toward the positive, referred to as Positive Discourse Analysis. Encouraging readers to reconsider their understanding of concepts such as power, action, context, critique, and reflexivity, this book illustrates the potential of theorizing discourse analysis from a positive orientation.

Through stories from kindergarten to sixth grade classrooms where students and teachers have attempted to put a critical edge on their teaching, this book shows critical literacy in action across the curriculum. Readers see students and teachers together using critical literacy discourse to frame conversations in ways that engage students in examining the meaning of the texts they read and acting on local and global social issues that emerge. Drawing on multiple perspectives such as cross-curricular explorations,
multimedia, and child-centered inquiry pedagogies, the text features a theoretical toolkit; demonstrations from across the content areas including art, music, and media literacy; integration of technology; and attention to how critical literacy can inform decisions about standards and assessment. Annotated booklists, examples of students' work, Reflection Questions, Try This (practical classroom strategies), and Resource Boxes can be used to encourage and support engaging in critical literacy work in different areas of the curriculum.

This book offers comprehensive coverage of critical literacies by pursuing a balanced approach to theory, research, and practice. By clarifying the gaps among the frameworks of critical literacies, the author discusses new ways of approaching them from global and multicultural perspectives and provides an instructional model of critical global literacies that draws on her own experience and an extensive literature review. This insightful book also documents teachers' case studies, focusing on their voices and instructional approaches in diverse classrooms. The author critically analyses the case studies and offers important suggestions for future research and practice. Accessible yet theoretically rich, this landmark text introduces key concepts and issues in critical discourse analysis and situates these within the field of educational research. The book invites readers to consider the theories and methods of three major traditions in critical discourse studies – discourse analysis, critical discourse analysis, and multimodal discourse analysis – through the empirical work of leading scholars in the field. Beyond providing a useful overview, it contextualizes CDA in a wide range of learning environments and identifies how CDA can shed new insights on learning and social change. Detailed analytic procedures are included – to demystify the process of conducting CDA, to invite conversations about issues of trustworthiness of interpretations and their value to educational contexts, and to encourage researchers to build on the scholarship in critical discourse studies. This edition features a new structure; a touchstone chapter in each section by a recognized expert (Gee, Fairclough, Kress); and a stronger international focus on both theories and methods. NEW! Companion Website with Chapter Extensions; Interviews; Bibliographies; and Resources for Teaching Critical Discourse Analysis.

This edited book examines how sexuality and sexual identity intersect and interact with other identities and subjectivities including but not limited to race, religion, gender, social class, ableness, and immigrant or refugee status to form reinforcing webs of privilege and oppression that have significant implications for language teaching and learning processes. The authors explore how these intersections may influence the different discursive fields and suggest that CDA be devised to increase the understanding of how different discourses are produced and how they have different learning spaces. They seek to open the conversation on intersectional issues as they relate to sexuality and language teaching and learning, and provide a conversational space where readers can engage with the notion of intersectionality. This book will be of interest to students and scholars of applied linguistics and language education, gender and LGBTQ+ studies, and sociolinguistics, outlining possible future directions for intersectional research. Joshua M. Paiz is a teaching assistant professor in EAP at George Washington University, USA. His current research focuses on LGBTQ+ inclusive pedagogies and teacher education and neurodiverse access and inclusion in ELT. His previous works include Queering the English Language Classroom: A Practical Guide for Teachers (2020). James Coda is an instructor in the Intensive English Program in the Division of Academic Enhancement at the University of Georgia, USA. His professional experience spans higher education as well as K-12, and his research centers on LGBTQ+ issues and queer theories/pedagogies in language teaching and learning. The Handbook of Educational Linguistics is a dynamic, scientifically grounded overview revealing the complexity of this growing field while remaining accessible for students, researchers, language educators, curriculum developers, and educational policy makers. A single volume overview of educational linguistics, written by leading specialists in its many relevant fields Takes into account the diverse theoretical foundations, core themes, major findings, and practical applications of educational linguistics Highlights the multidisciplinary reach of educational linguistics Reflects the complexity of this growing field, whilst remaining accessible to a wide audience. This book addresses notions of critique in Design and Technology Education, facilitating a conceptual and practical understanding of critique, and enabling both a personal and pedagogical application to practice. Critique can be a frame of mind, and may be related to a technology, product, process or material. In a holistic sense, critique is a critique of a person's technological literacy, a fundamentally critical disposition brought to bear on all things technological. This book provides a reasoned conceptual framework within which to develop critique, and examples of applying the framework to Design and Technology Education. The book builds on The Future of Technology Education published by Springer as the first in the series Contemporary Issues in Technology Education. In the 21st century, an 'age of knowledge', students are called upon to access, analyse and evaluate constantly changing information to support personal and workplace decision making and on-going innovation. A critical Design and Technology Education has an important role to play, providing students with opportunities to integrate economic, environmental, social and technological worlds as they develop and refine their technological literacy. Through the design and development of technology, they collaborate, evaluate and critically apply information, developing cognitive and manipulative skills appropriate to the 21st century. Critique goes beyond review or analysis, addressing positive and negative technological development. This book discusses and applies this deeper perspective, identifying a clear role for critique in the context of Design and Technology Education.

The book comprises papers presented at the 7th International Conference on University Learning and Teaching (InCULT 2014), which was hosted by the Asian Centre for Research on University Learning and Teaching (ACRULeT) located at the Faculty of Education, Universiti Teknologi MARA, Malaysia. Hosted by the University of Hertfordshire, UK; the University of South Australia; the University of Ohio, USA; Taylor's University, Malaysia and the Training Academy for Higher Education (AKEPT), Ministry of Education, Malaysia. A total of 165 papers were presented by speakers from around the world based on the theme “Educate to Innovate in the 21st Century.” The papers in this timely book cover the latest developments, issues and concerns in the field of teaching and learning and provide a valuable reference resource on university teaching and learning for lecturers, educators, researchers and policy makers. Offering fresh alternatives to common instructional practices that fail to get results, this accessible, highly practical guide highlights ways to motivate middle school students while enhancing content-area learning. Each chapter features an enlightening case study of a teacher whose current strategies are not supported by research; describes effective instructional alternatives, illustrated with concrete examples; and lists online resources and lesson examples. Emphasis is given to supporting critical engagement with texts and drawing on technology and new literacies. The book covers specific content areas—including science, social studies, math, and literature—as well as ways to teach oral literacy and writing across the curriculum. Demonstrating the power and potential of educators working together to use literacy practices that make changes in people's lives, this collaboratively written book blends the voices of participants in a teacher-led professional development group to provide a truly lifespan perspective on designing critical literacy practices. It joins these educators' stories with the history and practices of the group - K-12 classroom teachers, adult educators, university professors, and community activists who have worked together since 2001 to better understand the relationship between literacy and social justice. Exploring issues such as gender equity, linguistic diversity, civil rights and freedom and war, the book showcases teachers' reflective practice in action and offers insight into the possibilities and struggles of teaching literacy through a framework of social justice. Designing Socially Just Learning Communities models an innovative form of professional development for educators and researchers who are seeking ways to transform educational practices. The teachers' practices and actions – in their classrooms and as members of the teacher research group – will speak loudly to policymakers, researchers, and activists who wish to work alongside them. More emphasis is being placed on writing instruction in K-12 schools than ever before. With the growing number of digital tools in the
classroom, it is important that K-12 teachers learn how to use these tools to effectively teach writing in all content areas. The Handbook of Research on Digital Tools for Writing Instruction in K-12 Settings will provide research about how students use digital tools to write, both in and out of school settings, as well as discuss issues and concerns related to the use of these learning methods. This publication is beneficial to educators, professionals, and researchers working in the field of K-12 and teacher education.

The Routledge Handbook of Literacy Studies offers a comprehensive view of the field of language and literacy studies. With forty-three chapters reflecting new research from leading scholars in the field, the handbook pushes at the boundaries of existing fields and combines with related fields and disciplines to develop a lens on contemporary scholarship and emergent fields of inquiry. The Handbook is divided into eight sections: The foundations of literacy studies; Space-focused approaches; Time-focused approaches; Multimodal approaches; Digital approaches; Hermeneutic approaches; Making meaning from the everyday; Co-constructing literacies with communities. This is the first handbook of literacy studies to consider new trends and evolving trajectories together with a focus on radical epistemologies of literacy. The Routledge Handbook of Literacy Studies is an essential reference for undergraduate and postgraduate students and those researching and working in the areas of applied linguistics and language and literacy.

This book explores English language arts instruction from the perspective of language as "social actions" that students and teachers enact with and toward one another to create supportive, trusting relations between students and teachers, and among students as peers. Departing from a code-based view of language as a set of systems or structures, the perspective of language as social actions takes up language as emotive, embodied, and inseparable from the intellectual life of the classroom. Through extensive classroom examples, the book demonstrates how elementary and secondary ELA teachers can apply a language perspective. Beach and Beauchemin employ pedagogical cases and activities to illustrate how to enhance students' engagement in open-ended discussions, responses to literature, writing for audiences, drama activities, and online interactions. The authors also offer methods for fostering students' self-reflection to improve their sense of agency associated with enhancing relations in face-to-face, rhetorical, and online contexts.

Uniquely bringing together discourse analysis, critical literacy, and teacher research, this book invites teacher educators, literacy researchers, and discourse analysts to consider how discourse analysis can be used to foster critical literacy education. It is both a guide for conducting critical discourse analysis and a look at how the authors, alongside their teacher education students, used the tools of discourse analysis to inquire into, critique, and design critical literacy practices. Through an intimate look at the workings of a university teacher education course and the discourse analysis tools that teacher-researchers use to understand their classrooms, the book provides examples of both pre-service teacher "and "teacher educators becoming critically literate. The context-rich examples highlight the ways in which discourse analysis aids teachers decision making in the moment and reflections on their practice over time. Readers learn to conduct discourse analysis as they read about critical literacy practices at the university level. Designed to be interactive, each chapter features step-by-step procedures for conducting each kind of discourse analysis (narrative, critically oriented, multimodal), sample analyses, and additional readings and resources. By attending to the micro-interactions as well as processes that unfold across time, the book illustrates the power and potential of discourse analysis as a pedagogical and research tool.

critical literacy and multiliteracies, provide readers with an overview of trends in literacy/English teacher education. The chapters begin with authors' personal stories and current research, giving readers insight into the personal and professional worlds of the contributors. Included in each chapter is a rich description of approaches to literacy instruction in teacher education. These exemplary teacher educators show in concrete detail how they are addressing our evolving understanding of literacy. This timely text, written in a highly engaging style, will be of value to teacher educators throughout the world. I have never read anything quite like this book. It contains explicit representations of the conceptual frames and work of distinguished literacy teacher educators at various stages in their careers, accounts that provide a strong counter-narrative to the mainstream discourse in policy and education, that fully embrace the uncertainties and complexities of practice. From the Forward by Susan L. Lytle, Professor Emerita of Education in the Graduate School of Education, University of Pennsylvania Designing Critical Literacy Education through Critical Discourse AnalysisPedagogical and Research Tools for Teacher- ResearchersRoutledge

Demonstrating the power and potential of educators working together to use literacy practices that make changes in people's lives, this collaboratively written book blends the voices of participants in a teacher-led professional development group to provide a truly lifespan perspective in the study of critical literacy and literacy pedagogy. The book portrays the unfolding of stories within stories within stories with the history and practices of the group - K-12 classroom teachers, adult educators, university professors, and community activists who have worked together since 2001 to better understand the relationship between literacy and social justice. Exploring issues such as gender equity, linguistic diversity, civil rights and freedom and war, the book showcases teachersâ€™(tm) reflective practice in action and offers insight into the possibilities and struggles of teaching literacy within a framework of social justice. Designing Socially Just Learning Communities models an innovative form of professional development for educators and researchers who are seeking ways to transform educational practices. The teachers’ practices and actions â€“ their classrooms and as members of the teacher research group â€“ will speak loudly to policy-makers, researchers, and activists who wish to work alongside them.

Critical Literacy and Urban Youth offers an interrogation of critical theory developed from the author's work with young people in classrooms, neighborhoods, and institutions of power. Through cases, an articulated process, and a theory of literacy education and social change, Morrell extends the conversation among literacy educators about what constitutes critical literacy while also examining implications for practice in secondary and postsecondary American educational contexts. This book is distinguished by its weaving together of theory and practice. Morrell begins by arguing for a broader definition of the "critical" in critical literacy -- one that encapsulates the entire Western philosophical tradition as well as several important "Othered" traditions ranging from postcolonialism to the African-American tradition. Next, he looks at four cases of critical literacy pedagogy with urban youth: teaching popular culture in a high school English classroom; conducting community-based critical research; engaging in cyber-activism; and doing critical media literacy education. Lastly, he returns to theory, first considering two areas of critical literacy pedagogy that are still relatively unexplored: the importance of critical reading and writing in constituting and reconstituting the self, and critical writing that is not just about coming to a critical understanding of the world but that plays an explicit and self-referential role in changing the world. Morrell concludes by outlining a grounded theory of critical literacy pedagogy and considering its implications for literacy research, teacher education, classroom practice, and advocacy work for social change.

"A guide for researchers and reviewers." This book examines critical literacy within language and literacy learning, with a particular focus on English as an Additional Language learners in schools who traditionally are not given the same exposure to critical literacy as native-English speakers. An important and innovative approach to extant literature, this book explains how English language teachers understand critical literacy and enact it in classrooms with adolescent English language learners from highly diverse language backgrounds. This book brings together the study of two intersecting phenomena: how critical literacy is constructed in English language education policy for adolescent English language learners internationally and how critical literacy is understood and enacted by teachers amid the so-called 'literacy crisis' in neoliberal eduscapes. The work traces the ways critical literacy has been represented in English
language education policy for adolescents in five contexts: Australia, England, Sweden, Canada and the United States. Drawing on case study research, it provides a comparative analysis of how policy in these countries constructs critical literacy, and how this then positions critical engagement as a focus for teachers of English language learners. Empirically based and accessibly written, this timely book will be of interest to a wide range of academics in the fields of adolescent literacy education, English language learning and teaching, education policy analysis, and critical discourse studies. It will also appeal to teachers, post-graduate students and language education policy makers. This book examines the literacy practices of exemplary adult education teachers working within critical literacy frameworks. It provides an in-depth look at the complexity of adult literacy education through the lenses of these teachers. An understanding of this complexity helps teachers design literacy practices in classrooms on a daily basis. This is an important book for there is considerable pedagogical and political attention focused on adult literacy education at this time. As the field of adult education continues to grapple with issues of teacher professionalism/certification, it adds a much needed teacher perspective. Appropriate as a text for adult education courses, this volume will also appeal to researchers, teacher educators, practitioners, and graduate students across the field of literacy education. This edited book shows how critical literacy can be applied in and outside the classroom setting. It shows educators how critical theory is applied in practice using studies in diverse K-16 settings, kindergarten through university contexts. By providing specific examples of critical literacy practice in the classroom and beyond, the book aims to help teachers, researchers and teacher educators make clear connections between theory and practice in critical literacy. Uniquely bringing together discourse analysis, critical literacy, and teacher research, this book invites teacher educators, literacy researchers, and discourse analysts to consider how discourse analysis can be used to foster critical literacy education. It is both a guide for conducting critical discourse analysis and a look at how the authors, alongside their teacher education students, used the tools of discourse analysis to inquire into, critique, and design critical literacy practices. Through an intimate look at the workings of a university teacher education course and the discourse analysis tools that teacher-researchers use to understand their classrooms, the book provides examples of both pre-service teachers and teacher educators becoming critically literate. The context-rich examples highlight the ways in which discourse analysis aids teachers’ decision making in the moment and reflections on their practice over time. Readers learn to conduct discourse analysis as they read about critical literacy practices at the university level. Designed to be interactive, each chapter features step-by-step procedures for conducting each kind of discourse analysis (narrative, critically oriented, multimodal), sample analyses, and additional readings and resources. By attending to the micro-interactions as well as processes that unfold across time, the book illustrates the power and potential of discourse analysis as a pedagogical and research tool. This book explores the impact of sensation, affect, ethics, and place on literacy learning from early childhood through to adult education. Chapters bridge the divide between theory and practice to consider how contemporary teaching and learning can promote posthuman values and perspectives. By offering a posthuman approach to literacy research and pedagogy, Affect, Embodiment, and Place in Critical Literacy re-works the theory-practice divide in literacy education, to emphasize the ways in which learning is an affective and embodied process merging in a particular environment. Written by literacy educators and international literacy researchers, this volume is divided into four sections focussing on: Moving with sensation and affect; becoming worldmakers with ethics and difference; relationships that matter in curriculum and place; before drawing together everything in a concise conclusion. Affect, Embodiment, and Place in Critical Literacy is the perfect resource for researchers, academics, and postgraduate students in the fields of literacy education and philosophy of education, as well as those seeking to explore the benefits of a posthumanism approach when conceptualising theory and practice in literacy education. Supporting and challenging cooperating teachers to grow in their mentoring and coaching practices with preservice teachers and also in their own work as classroom teachers, this practical guide presents and illustrates the Coaching with CARE model—a framework for reflection and action that helps cultivate a perspective on teaching that puts students at the center of teacher preparation and places value on apprenticeship and participation in learning. The CARE model takes a turn away from traditional evaluation-based “training” approaches, offering a way for cooperating teachers, and facilitators and university teacher educators who work with them, to come together to shape innovative coaching and mentoring experiences for preservice teachers. Mentoring Preservice Teachers Through Practice, building on the authors’ own work with cooperating teachers, is based on the most recent research on learning to teach and supporting preservice teachers and grounded in the realities of teacher education today. Each chapter includes questions for discussion and suggested readings that can be used to explore the focus of the chapter more deeply as well as relevant research reports published by the authors. Writing development is currently the focus of substantial international debate because it is the aspect of literacy education that has been least responsive to central government and state reforms. Teaching approaches in writing have been slower to change than those in teaching reading and pupil attainment in writing has increased at a much more modest rate than pupil attainment in reading. This handbook critically examines research and theoretical issues that impact on writing development from the early years through to adulthood. It provides those researching or teaching literacy with one of the most academically authoritative and comprehensive works in the field. With expert contributors from across the world, the book represents a detailed and valuable overview of a complex area of study. Offering an overview of the major fields in literacy studies, this book presents a detailed and accessible discussion of key theories and their relevance in the primary classroom. Each chapter uses a real life case study to explore the application of theory in practice, followed by a detailed discussion of the case study material by a leading name in the field, including contributions from Barbara Comber, Michele Knobel, Colin Lankshear, Gunther Kress, Brian Street, Kevin Leander and Patricia Enciso. The text also offers reflections on theoretical foundations for research, exploring literacy as a practice grounded in social, cultural, historical and political contexts and in relationships of power. This second edition includes: New chapters covering digital literacy, space and play, and multimodality Examples and contributions from a range of international contexts, including US, UK, Canada, Australia and South Africa Further reading links. Essential reading for students at undergraduate and post-graduate level on primary education courses and an invaluable guide for anyone wanting to understand literacy theory and successfully apply this to the classroom. Uniquely bringing together discourse analysis, critical literacy, and teacher research, this book invites teacher educators, literacy researchers, and discourse analysts to consider how discourse analysis can be used to foster critical literacy education. It is both a
guide for conducting critical discourse analysis and a look at how the authors, alongside their teacher education students, used the tools of discourse analysis to inquire into, critique, and design critical literacy practices. Through an intimate look at the workings of a university teacher education course and the discourse analysis tools that teacher-researchers use to understand their classrooms, the book provides examples of both pre-service teachers and teacher educators becoming critically literate. The context-rich examples highlight the ways in which discourse analysis aids teachers' decision making in the moment and reflections on their practice over time. Readers learn to conduct discourse analysis as they read about critical literacy practices at the university level. Designed to be interactive, each chapter features step-by-step procedures for conducting each kind of discourse analysis (narrative, critically oriented, multimodal), sample analyses, and additional readings and resources. By attending to the micro-interactions as well as processes that unfold across time, the book illustrates the power and potential of discourse analysis as a pedagogical and research tool.

"The definitive reference on literacy research methods, this book serves as a key resource for researchers and as a text in graduate-level courses. Distinguished scholars clearly describe established and emerging methodologies, discuss the types of questions and claims for which each is best suited, identify standards of quality, and present exemplary studies that illustrate the approaches at their best. The book demonstrates how each mode of inquiry can yield unique insights into literacy learning and teaching and how the methods can work together to move the field forward"--

The narrowing of English language education curriculum in many contexts has negatively impacted classroom teaching and learning. High-stakes standardized testing, scripted curricula, and the commodification of English have converged to challenge socially meaningful classroom literacy instruction that promotes holistic development. Although in different ways, these factors have shaped the teaching of English as both first and second language. How can English educators respond? This book argues that the first step is to take account of the broader policy, political and cultural landscape and to identify the key constraints affecting teachers, students and parents. These will set the broad parameters for developing local pedagogic approaches, while still recognizing the constraints that actively push against them. Using Singapore English language teaching as a case study, this book illustrates how this process can unfold, and how media literacy principles were vernacularized to design English classroom pedagogies that stretched the bounds of what is acceptable and possible in the local context.

As it stands, there is currently a void in education literature in how to best prepare preservice teachers to meet the needs of individualized learners across multiple learning platforms, social/economical contexts, language variety, and special education needs. The subject is in dire need of support for the ongoing improvement of administrative, clinical, diagnostic, and instructional practices related to the learning process. The Handbook of Research on Reconceptualizing Preservice Teacher Preparation in Literacy Education stimulates the professional development of preservice and inservice literacy educators and researchers. This book also promotes the excellence in preservice and inservice literacy both nationally and internationally. Discussing topics such as virtual classrooms, critical literacy, and teacher preparation, this book serves as an ideal resource for tenure- track faculty in literacy education, clinical faculty, field supervisors who work with preservice teacher educators, community college faculty, university faculty who are in the midst of reconceptualizing undergraduate teacher education curriculum, mentor teachers working with preservice teachers, district personnel, researchers, students, and curricula developers who wish to understand the needs of preservice teacher education.

A comprehensive manual for pre- and in-service ESL, EFL, and EIL educators who work with multilingual students at the secondary and postsecondary levels, this text balances insights from reading theory and research with highly practical, field-tested strategies for teaching and assessing second-language reading that educators can readily adopt and adapt to suit their contexts and student populations. Teaching Readers of English is a complete "go-to" source for teaching reading and promoting classroom and professional literacies in an increasingly digital world. Offering principled approaches and methods for planning and delivering effective L2 reading instruction, the text includes pedagogical features, such as questions for reflection, further reading and resources, and application activities to develop purposeful classroom reading lessons in a range of contexts. Changes in the Second Edition: Updated and revised chapters on formative and summative reading assessment, developing vocabulary knowledge and grammatical skill, and cultivating extensive reading and literary appreciation. Updated information on institutional settings and reader demographics. New pedagogical features in each chapter, including Chapter Summaries, Further Reading, Reflection and Review, and Application Activities. A streamlined chapter sequence to enhance the text's usability. This textbook brings together internationally renowned scholars to provide an overview of print and digital literacy instruction for pre-service teachers and teacher educators. It examines historical and cultural contexts of literacy practices around the globe, and addresses issues that teachers need to consider as they teach children from diverse world cultures, languages, and backgrounds. Organized into three Parts—Early Literacy, Intermediate to Adolescent Literacy, and Case Studies—the text highlights key practices around the world to provide literacy educators and students with a broader view of effective practices as well as strategies for overcoming challenges faced by literacy educators worldwide. The global case studies present complex issues and allow readers to discuss what it means to be globally minded, as well as how to implement best practices in literacy instruction. All chapters include consistent elements for ease of use, such as vignettes, historical and cultural contexts, implications for future research, and discussion questions. Grounded in current research and theory, this book is designed for foundational courses in literacy education and literacy methods, as well as courses in comparative and multicultural education.
